

MAKING A DIFFERENCE

It is our mission to improve the quality of health care, to serve our local and extended communities, and to impact institutional excellence and growth.

OUR COMMITMENT TO COMMUNITY SERVICE

Through service and partnership, the Center for Innovation at Western University of Health Sciences thrives to promote a culture of innovation, and improve the quality of life through medical innovation, as well as being an agent of change within our communities.

THE CENTER FOR INNOVATION WILL

fuel a medical device and digital health hub that creates educational opportunities around innovation for researchers, students, and community members.

COMMUNITY OF INNOVATORS PROGRAM FOR THE UNDERSERVED (CIPU)

WE EMPOWER THE COMMUNITY

The "Community of Innovators Program for the Underserved" (CIPU) is a program designed to empower and enable youth community members from the underserved population by leveraging each person's innate ability to innovate, thus providing life-long, life-changing skills to become self-reliant, skilled, and self-motivated in their life journey to become successful inventors and innovators. One of our organizational key pillars is to serve our local and extended communities and improve people's quality of life. We have made tremendous impact to the underserved communities through various community services and continue to do so even more resolutely given the current tragic health and economic crisis.

THE PROGRAM AND CURRICULUM

This program offers a completely free asynchronous online program to teach innovation concepts that provide young people with the required skills to come up with ideas and guide them to turn these ideas into actualized innovation products. The program curriculum will teach about self-belief and innovation concepts and show how to transform ideas into tangible, real, and marketable products.

FREE E-BOOK

INNOVATION CORE CONCEPTS

Understand foundational knowledge related to innovation, as well as the meaning and implication of concepts such as innovation, ideation, creativity, and invention. Learn to translate knowledge concepts into practical skills applicable in the real world.

FREE KIT

INVENTORS & MAKERS CONCEPTS

Acquire basic skills to build your own digital innovation through learning to use microcontroller unit and even program your first device! No prior technical experiences are required for these hands-on learning activities.

GET CERTIFIED

LEARNLOGIC™ INNOVATION SUPERSTAR

Become a certified Innovation Superstar through a unique learning experience provided to you by LearnLogic. Acquire the knowledge and skills to become an accomplished innovator by completing this prestigious training program.
